

About BizConnectPro

About BizConnect Pro

The City of Buckeye has contracted with **BizConnectPro** to provide business licensing and renewal services.

The City of Buckeye is now using the **BizConnectPro** system to handle all business licensing needs. Our goal is to provide a greater degree of service and convenience for our business community.

BizConnectPro not only allows you to take care of your new business license and business license renewal online, but also gives you access to your business license account year round for any changes you may need to make. Additionally, BizConnectPro will be handling all hard-copy document processing, payment processing and reconciliation as well as telephone and email customer service.

BizConnectPro will also allow the City of Buckeye to communicate directly with its business community through an info-blast feature that will keep you apprised of critical information that may impact your business in some way.

In the coming months, **BizConnectPro** will be launching a business directory that will bring a greater degree of visibility to the Buckeye business community. Your business will be featured in up to two categories chosen by each business entity. Stay tuned for more information.

We're excited about this new service and look forward to finding new ways to help our businesses succeed!
