

# City Pool & Skate Park Fence Replacement Project

\$72,316 under budget

**COMPLETED**

This project replaced 451 feet of matching wrought iron fence around the City Swimming Pool & Skate Park, successfully contributing to the safety, health, and overall enjoyment of the citizens who utilize these facilities.

## HIGHLIGHTS:

- Replaced deteriorated wrought iron fence around both facilities.
- Corrected irrigation issue by designing and building a 2 foot CMU wall around the perimeter to protect the area from consistent sprinkler water exposure, which was previously compromising the integrity of the wrought iron.
- Coordinated reuse/recycling efforts of the old fencing materials, saving potentially hundreds of dollars while remaining environmentally conscious.
- Alleviated the source of many complaints among the citizens by installing a privacy screen between the Skate Park and the Swimming Pool, keeping activities at each facility separate.
