

Truss Calculation Deferred Submittal

Property Address: _____

Lot/Subdivision: _____

Applicant: _____

I hereby request deferral of the truss calculation submittal for the above referenced address. I understand that the deferred submittal is an option and would require that I submit truss calculations for review and approval prior to the roof nailing and shear inspection on this project.

Two sets of the truss calculations will be submitted directly to the City of Buckeye for review along with the complete set of approved building plans. The truss calculations will be signed and sealed by an Arizona registered professional structural or civil engineer. Calculations must be stapled or bound. Paper clips or binder clips are not permitted.

Pursuant to IBC Section 107.3.4.1 deferred design submittal documents shall be sealed construction/design documents and shall bear document review/approval stamp(s) with the following notation: *"These deferred design submittal documents have been reviewed and they have been found to be in general conformance with the design of the building. Deferred design submittal items shall not be installed until these deferred design submittal documents have been approved by the Building Official."* The review/approval shall include the legible printed name of the project registrant architect and project registrant engineer responsible for that project discipline and their signatures.

The deferred truss review fee will apply. Approved truss calculations shall remain on the job site with the approved building plans.
