

Helpful Tips for Trash, Recycling & Alley Placement

- You must have a solid waste account with the City of Buckeye
- Please do not park your vehicle in dead-end drives since this blocks collection vehicles

Can Placement

Street Collection

- Place both trash and recycle carts in front of your house, on the street, with wheels next to the curb

Alley Collection

- Place both carts next to your driveway, and next to the pavement

General Service

- For service, all cans should be placed out the night before collection
- For storage, all cans should be placed out of sight

Bulk Trash

We DO NOT collect bulk trash from alleys

Bulk trash piles should be placed in front of your home, on the edge of your property, next to the street or sidewalk

- Placing your bulk trash on the street or sidewalk creates a safety hazard for your neighbors
- Be nice to your neighbors and avoid placing piles in front of their homes
- Bundle (stack and tie) branches

If your home has an alley with no streetfront:

- Place your bulk pile at the end of the alley that is closest to your home
- Place the bulk pile in the landscaped area only, NOT on street or sidewalk
- Place bulk trash in neat, stacked piles
